NPIC/TDS/DS-776-67
27 March 1967

MEMORANDUM FOR: Chief, Procurement Division

ATTENTION : [] 25X1A

25X1A

SUBJECT : Waiver Under []

1. The Multi-Format Data Block Reader (MPDBR) being developed under subject contract is designed to read twelve different data block formats. Of these, six are unique formats and six are of the MIL-STD-782 B variety.

2. At present, there is no solid-state recording system in being to generate the MIL-STD-782 B type of data block. Current predictions are that this type of recording may be as much as three years away from being a reality. In a discussion with the contractor on 20 March 1967, it was determined that a waiver was needed deleting the testing of the instrument with the MIL-STD-782 B formats from the test specifications since we cannot provide test film for these formats. Instructions should also be given to deliver the instrument without verifying these formats.

3. It is requested the above action be taken and the contractor be so informed. It is also requested the contracting officer contact GIMRADA and obtain a similar waiver on the machine being built for that organization.
